RE: Letter of Recommendation for RKS Plumbing & Mechanical

Dear Joe,

Our companies have completed many projects over the years ranging from new school projects, residential housing for Universities, Library expansion, and most recently the new Town Hall complex in Buckeye.

RKS Plumbing & Mechanical has been given challenges to meet construction budgets established by CORE and to maintain an extremely tight construction schedules set in place by our clients. Due in part to RKS' efforts, every project not only has met the CM@R Budget for the Plumbing scope of work, but has also met the fast-tracked construction schedule that some of these projects require.

I commend RKS Plumbing & Mechanical for their safety measures as well as their effective and efficient methodologies. Once selected in the CM@R process RKS Plumbing & Mechanical is able to provide pre-construction Value Engineering options to the project for both Owner and Architect review and selection. The transition to the construction phase is always seamless. The entire RKS team is easy to work with, knowledgeable and solution-minded. Their service minded approach to the Construction Project made both it possible to complete the project on time.

It is with pleasure that I recommend RKS Plumbing & Mechanical for any Construction Project. We look forward to working with you in the future.

Sincerely,

A handwritten signature in black ink, appearing to read "Gary Wenk".
